CAREER OBJECTIVE

Final-year Computer Science (AI & ML) student with hands-on experience in full-stack development, data handling, and documentation through internships, academic projects, and technical leadership roles. Skilled in research, data collection and analysis, report and presentation preparation, and cross-functional collaboration. Seeking to contribute as a Campus Trainee by supporting project tasks, research, and documentation activities while building strong professional and technical skills.

EDUCATION

Bachelor of Technology - Computer Science (AI & ML)

Aug 2022 - Jun 2026

SR Group of Institutions, Jhansi (Affiliated to Dr. APJ Abdul Kalam Technical University, AKTU) | CGPA: 7.6

Class 12 (PCM): 90% | Class 10: 96%

CORE COMPETENCIES

Research & Analysis: Data collection, data analysis, technical research, structured documentation

Documentation & Reporting: Report writing, presentation preparation, process documentation, technical writing

Collaboration & Communication: Cross-functional teamwork, stakeholder communication, workshop facilitation, mentoring

Quality & Ownership: Task ownership, attention to detail, adherence to guidelines and quality standards, time management

Learning Agility: Quick adoption of new tools/technologies, active participation in training and workshops

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, SQL

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, MongoDB, REST APIs, MySQL, Spring Boot

Tools & Platforms: Git, GitHub, VS Code, Figma, Postman, Jupyter Notebook, MS Office (Word, Excel, PowerPoint)

Concepts: Data Structures & Algorithms, Authentication (JWT), API Design, System Design Basics, Responsive UI

GenAI & AI: Generative AI (LLMs), Prompt Engineering, OpenAI API, AI Integration

EXPERIENCE

Software Engineer Intern - AcciLives

Nov 2024 - Apr 2025

- Assisted the engineering team in project tasks including requirement analysis, backend development, and documentation of REST APIs for user and product management.
- Collected and analyzed application performance data to identify and resolve database query bottlenecks, improving overall API performance.
- Implemented JWT-based authentication and role-based access control, following project guidelines and quality standards.
- Integrated the Razorpay payment gateway for secure transaction processing.
- Prepared technical documentation and contributed to knowledge-sharing within the team.

Tech Lead - Google Developer Groups (GDG SRGI)

Sep 2024 - Aug 2025

- Planned, organized, and conducted five technical workshops on full-stack development, preparing training material and presenting findings to participants.
- Mentored 50+ students in React.js, Node.js, and project building, supporting their learning through structured guidance and feedback.
- Organized developer events and coordinated with team members to improve student participation and engagement.

PROJECTS

Blinkit-Style Grocery Delivery Platform (Full Stack, Scalable Architecture) Nov 2025 - Feb 2026

- Engineered a full-stack grocery delivery system replicating core Blinkit features, including a dynamic product catalog with search and filtering.
- Documented and built the complete order lifecycle: cart, checkout, payment, and tracking.
- Designed an admin dashboard for product management, order tracking, and analytics reporting.
- Implemented JWT authentication and role-based authorization (Admin/User); optimized backend APIs and MongoDB queries for performance and scalability.
- Tech Stack: Next.js, Node.js, Express.js, MongoDB, TypeScript, JWT, Razorpay.

Mail Crawler - Automated Email Data Pipeline

May 2026

- Engineered an automated email crawling system using Spring Boot to scan, filter, and analyze emails based on sender, subject, and labels.
- Developed intelligent parsing logic to extract structured data (OTP, order details, delivery information) from unstructured content.
- Built an end-to-end data pipeline (fetching, parsing, transformation, storage) and synchronized results to Google Sheets for reporting and record-keeping.
- Designed scheduled background jobs for periodic data collection and implemented error handling/logging for reliability.
- Tech Stack: Java, Spring Boot, Gmail API, Google Sheets API, OAuth 2.0, Gradle.

ACHIEVEMENTS & ACTIVITIES

- Secured global rank 3555 in [TCS CodeVita Season 12](#).
- Completed the [GenAI Powered Data Analytics](#) Job Simulation by Tata Group on Forage.
- Member, Google Developer Student Club (2022-2024) and Microsoft Learn Student Ambassador (2022-2024).
- Participant, Smart India Hackathon 2023 & 2024.
- Awarded Gold Medal - College Chess Championship.
